

I do not appreciate being given a piece of equipment from Sorenson VRS company in the name of "giving back to the deaf community" and then forced to use that equipment with that one vrs service. And Sorenson is then getting funded by the government!! Its robbery!! I demand to be treated as an equal and have equal access. No more is the TTY an equal access. How would you like to have only the choice of a Black and White TV while others are watching HD TV??? That is what its like being deaf and forced to either use the TTY or forced to have to make VRS calls with only 1 service. Where is the equivalence in that???
